

XTM Security Subscriptions

FOR DEFENSE-IN-DEPTH AGAINST NETWORK THREATS

WatchGuard offers six security subscriptions for its next-generation XTM appliance family so businesses can layer on protection where they need it most. Subscriptions can be purchased individually or bundled together for even greater savings.

AVAILABLE FOR ALL XTM SOLUTIONS

XTM security subscriptions complement the built-in protection of your WatchGuard XTM firewall, boosting protection in critical attack areas, including assaults from spyware, spam, viruses, trojans, web exploits, and blended threats.

“ Not only are we **saving money**, we have content filtering **much more effective** than what we had before.”

*Wilson Chan
Information Systems Manager
Durham School District*

APPLICATION CONTROL

Application Control has become an essential component of next-generation security. It protects the network and keeps users on the tasks that matter by blocking unproductive and inappropriate apps.

- Gain control over 2,000 web and business applications, using more than 2,500 unique signatures.
- Have complete visibility into applications used, with intuitive monitoring and reporting capabilities.
- Control usage of applications by category, application, or application sub-functions.

INTRUSION PREVENTION SERVICE (IPS)

By adding an IPS subscription, your network gains in-line protection from attacks, including buffer overflows, SQL injections, and cross-site scripting attacks.

- All ports and protocols are scanned to block network, application, and protocol-based attacks.
- Blocked sites list saves valuable processing time by dynamically blocking IP addresses that have been positively identified as the source of an attack.

WEBBLOCKER

URL and content filtering are indispensable for controlling access to sites that host objectionable material or pose network security risks. These include known spyware and phishing sites.

- Configure over 100 web categories to stop the sites and web tools you most want to block.
- URL database is hosted in the cloud to simplify setup and administration. A local install option is also available.
- Enable access by user, group, domain, and need for maximum flexibility.

GATEWAY ANTIVIRUS

Scans traffic on all major protocols to stop threats before they can gain access to your servers and execute their dangerous payloads.

- Heuristic analysis identifies viruses and dangerous code that signatures can't catch.
- Decompresses and scans all common formats, including .rar, .zip, .gzip, .tar, .jar, .chm, .lha, .cab., .arj, .ace, .bz2, and multiple layers of compression.

REPUTATION ENABLED DEFENSE

WatchGuard XTM is the only unified threat management system on the market that includes a powerful, cloud-based reputation lookup service to ensure faster, safer web surfing.

- Continuous updates keep current with dynamic web content and changing web conditions.
- Up to 50% of URL scanning can be skipped without compromising security, resulting in faster browsing times and greater throughput at the gateway.

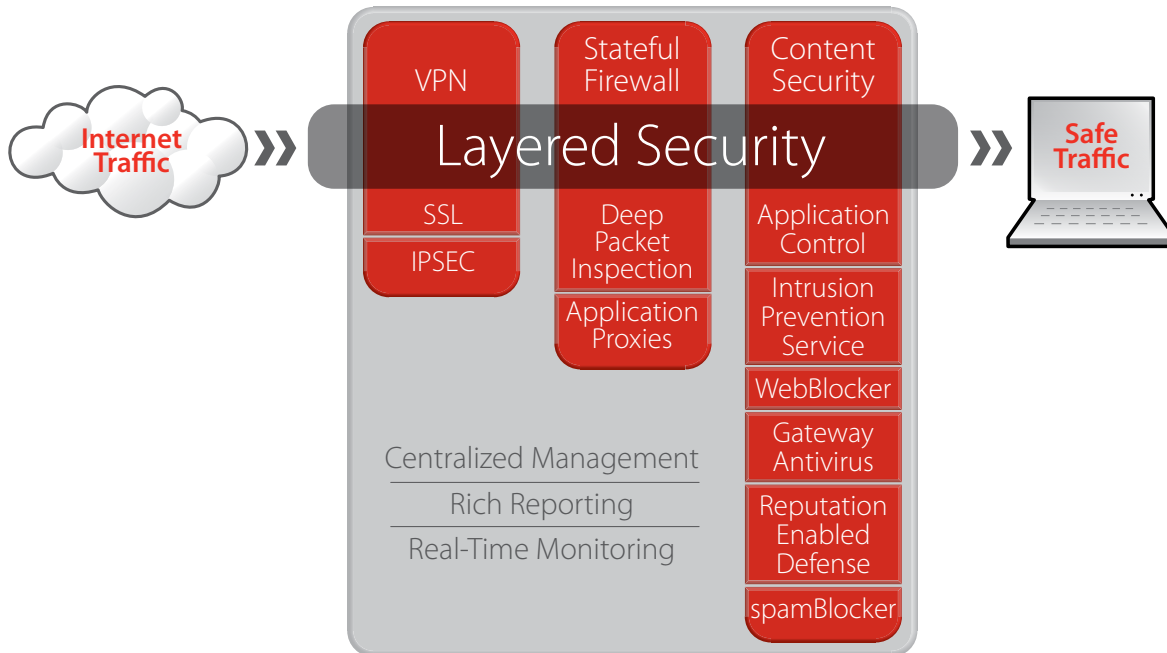

SPAMBLOCKER

Rely on spamBlocker's industry-leading Recurrent Pattern Detection (RPD™) technology to detect spam outbreaks as they emerge for immediate, continuous protection from unwanted and dangerous email.

- Block spam regardless of the language, format, or content of the message – even image-based spam that other anti-spam products often miss.
- RPD identifies and blocks viral payloads for an additional layer of real-time anti-virus protection.

WatchGuard Extensible Threat Management

MANAGING SUBSCRIPTIONS IS EASY

Security functionality on your WatchGuard XTM solution, including all subscriptions, can be managed from a single intuitive console, web UI, and command line interface for maximum efficiency and ease of use.

KNOW WHAT'S HAPPENING ON YOUR NETWORK AT ALL TIMES

- Any security activity identified by a service is logged and stored for easy reporting so you can take immediate preventive or corrective action.
- All management tools, including rich reporting and monitoring, are included with your WatchGuard XTM purchase. There is no additional hardware or software to buy.

BEST-IN-CLASS UTM

WatchGuard works with best-in-class suppliers of security technology to deliver an integrated solution that out-performs the competition.

- AVG** – a consistently high performer in independent Virus Bulletin testing, provides the engine for Gateway AntiVirus.
- Commtouch** – Patented RPD® technology in the Cloud provides spamBlocker with the only effective anti-spam solution for low footprint UTM appliances. Up to 4 billion messages per day reviewed.
- Websense** – Supplies the cloud-based URL database for WebBlocker. Security coverage is supplemented by Websense Security Labs and their ThreatSeeker Network.
- Broadweb** – Leading provider of IPS and Application signatures, delivering comprehensive protection against the latest Internet threats.

BUY THE BUNDLE AND GET THE WORKS

Get everything you need for complete threat management in one convenient package when you purchase a security bundle.

THE XTM SECURITY BUNDLE INCLUDES:

- WatchGuard XTM appliance***
- Application Control** to keep your users on the tasks that matter
- Intrusion Prevention Service (IPS)** with comprehensive attack protection across all ports and protocols
- WebBlocker** with HTTP and HTTPS inspection
- Gateway AntiVirus** for protection from malware
- Reputation Enabled Defense** for faster, safer web surfing
- spamBlocker** with virus outbreak detection
- LiveSecurity® Service** for hardware warranty, free software updates, 24/7** technical support, and security alerts

GOT THE BOX? GET THE SOFTWARE SUITE

Turn your WatchGuard XTM into a complete threat management solution with the Software Suite. The suite includes all of the security subscriptions listed above, and can be purchased to upgrade a solution or to renew existing service subscriptions.

ALSO AVAILABLE: NEXT-GENERATION SECURITY BUNDLES

Customers can choose to purchase a Next-Generation Security Bundle, which includes the choice of XTM 8 Series, 1050, or 2050 solution with Application Control, IPS, and LiveSecurity Service with 24/7 technical support. For details, visit www.watchguard.com/next-generation.

*Your choice of hardware or virtual appliance

**Technical support hours/days for XTM 2 Series are 12/5

One-year and three-year subscription packages are available for all WatchGuard bundles and suites.
