

# EXILIM EX-H10

Around the world in 1000 photos

EXILIM  
Hi-ZOOM

- ▶ 1000 photos on one battery charge
- ▶ 24-mm wide-angle lens
- ▶ 10 x optical zoom with mechanical image stabiliser
- ▶ HD video recording
- ▶ 12.1 megapixels

## ADDITIONAL FEATURES

### Bright and high-contrast 7.6 cm (3.0 inch) TFT colour display (Super Clear LCD)

Very bright and high-contrast wide-screen TFT colour display (Super Clear LCD) — unusually high contrast permits viewing from almost any angle.

### Landscape Mode

The Landscape Mode automatically reduces clouding, haziness or mist in the image. The outcome is a clearer skyline with sharp contours and a bright sky.

### EXILIM Engine 4.0

Be it backlighting, portrait and night scenes or difficult light conditions — the new EXILIM Engine 4.0 image processor reduces energy consumption by almost 30% and masters these challenges admirably.

### Dynamic Photo function

This function enables you to cut a moving motif out of several photos, resize the image and use another photo as the background. Dynamic Photo subjects can be transformed into a video from the camera itself — with no need for editing on a computer.

### Face Detection Function

The Face Detection Function recognises faces and applies the best possible setting automatically.

The EXILIM Hi-Zoom EX-H10 is available to buy from specialist dealers, shopping centres, electrical goods stores and all good shops.
