4K HDMI KVM Extender Set, HDBaseT, UHD 4K*2K@30Hz 70m over network cable (Cat 5E, 6)

The Digitus 4K HDMI KVM Extender Set consists of a transmitter unit (local control) as well as a receiver unit (remote control). The HDMI signal can be extended via a network cable (CAT 6) to a maximum distance of 70 m (Full HD video content). 4K video content can be extended to up to 40 m using a CAT 6 network cable. The highest supported video resolution is 4K/30 Hz. It also makes convenient access on a computer (mouse and keyboard) possible via the USB ports on the receiver unit. It is perfectly suited to industrial, commercial and public applications. The package also includes two bidirectional infrared units (sender, receiver), which can be used for the remote control of the connected input source.

Extends the HDMI signal to up to 70 m and renders it possible to control keyboard and mouse via USB on the receiver unit
