

Towards nature
and climate positive
guided by WWF

dbramante1928
a case for the environment

Our mission together with WWF:

STOP PLASTIC POLLUTION

Alongside WWF dbramante1928 is working to stop the flow of plastic into nature, eliminate unnecessary plastic, and improve the sustainable production and management of the remaining necessary plastic by 2030.

DBRAMANTE1928 IS THE ONLY CE ACCESSORIES VENDOR IN THE WORLD THAT HAS A PARTNERSHIP WITH WWF

Working together we are putting nature at the heart of everything we do.

PLASTIC DOES NOT BELONG IN NATURE

Nearly half of all plastic products littering the world today were created after 2000. This issue is only decades old, and yet over 75 per cent of all plastic ever produced is already waste.

8 million tonnes of plastic ends up in the ocean every year. They break down into tiny bits called microplastics, small enough to enter our food chain, along with other types of microplastics like those that are released when we wash our clothes.

RECYCLED PLASTIC WITH WWF

Our joint approach to plastic pollution is to reduce the 'bad' single-use plastic products replacing them with products equally as strong, durable, functional and protective but critically climate and planet-friendlier made from 100% recycled plastic materials. In this way, we reduce existing waste and slow the flow of new plastic into nature whilst protecting your cherished devices and the planet at the same time. In addition, we are 'raising the bar' and putting pressure on others in CE Accessories to also behave planet-friendlier.

A better deal for you, for the planet and it's not costing the earth.

dbramante1928
a case for the environment

Guided by WWF, dbramante1928 is becoming the Worlds 1st Climate Positive CE Accessories Vendor.

Become part of the solution not the pollution:

STOP PLASTIC POLLUTION

HELP us stop the flow of 'bad' plastics into nature by choosing a 100% recycled plastic case that won't cost the earth.

100% recycled plastic

REUSE
REDUCE
RECYCLE

1 plastic bottle has the equivalent amount of material as used to make a 100% recycled case

It's only those products certified by the GRS that you can be sure hold both a verified recycled content of the product certification and a verified responsible social, environmental and chemical practices

Snap-on instant impact protection

MADE FROM 100% RECYCLED PLASTIC

Our Greenland cases are planet-friendly without compromising on quality, protection, design or functionality. Protect your phone and Planet at the same time with this fashion-forward, comfort-grip, snap-on impact protection case. When you done simply put your case in the residual waste bin for recycling into another product.
