

# FLASH DUPLICATION

## CopyWriter Flash Duplicators

800.646.8881 [microboards.com](http://microboards.com)

Copy USB thumb drives in a flash with the Microboards CopyWriter Flash Duplicators. Available in 3, 7, or 11-slot configurations, users can make up to 11 copies at a time in a single system. Making copies with the CopyWriter Flash Duplicator is easy; simply insert your master thumb drive and up to 11 blank devices, then press the OK button.

Asynchronous copying technology and a large memory cache allows for every slot to operate independently.

Copy jobs of any size (64 MB on-board memory with 3-slot configuration, 256 MB for 7- and 11-slot systems) and permit target devices to be unloaded and loaded on the fly. As soon as a slot signals ready, you can remove the finished, copied media and insert another blank device.

Because these copiers operate without the help of a PC, they're easy for anyone to use. Bit-level comparison ensures a successful copy every time. All current formats (Fat 16, Fat 32) are supported, and the unit is backed by Microboards' industry-leading support with a one-year warranty and lifetime phone support. CopyWriter Flash Duplicators can also be used to erase content from flash devices, leaving you with a clean, unformatted device.

As the cost of flash memory comes down, the distribution of information on flash becomes more and more viable for companies in the following areas: Marketing/Communications, Field Sales Support, Education, Government, Engineering, Audio/Video, and more! With the Microboards CopyWriter Flash Duplicator, you have the ability to make multiple copies quickly, reliably, and without effort.

*Also available in 3-slot and 7-slot configurations!*
