

TerraTec G3

- Handy USB box for digitising videos
- Simple connection via Scart or S-Video/composite
- Gold-plated connections
- High-quality aluminium housing
- Software for Windows PC and Mac
- Includes all needed cables

The TerraTec G3 is the compact solution for transferring, editing and burning analogue videos on your home computer. The quality is uncompromising: the housing is made of anodised aluminium, the inputs are gold-plated, and all cables with high-quality connectors are included in the scope of delivery. The software provided, MAGIX movies on DVD TerraTec Deluxe Edition, provides many options and makes editing on your PC as easy as child's play. Mac users can take advantage of the GrabCap capture tool; video editing then takes place in iMovie. This ensures that your precious memories are secured optimally – just save them or burn them to DVD straight away!

Save your precious memories

Time takes its toll on your precious memories. Family gatherings, company parties, holidays – you've captured all these events and memories on video tapes. The short life expectancy even with optimal storage, magnetic fields, loss of quality due to wear, or just chewed-up tapes due to curious children ... the dangers that jeopardise these memories are many. Avoid them all by transferring your cassettes to your computer and saving your movies there – or burning a DVD, which also makes a great gift!

Comprehensive format support

Very many analogue sources can be connected to the TerraTec G3. Whether VHS, Video 8, S-VHS, Hi8, Betamax or others – almost every device with analogue outputs is compatible. And whether your output source is a Scart output, S-Video or composite, the TerraTec G3 is connected to it in no time. Thanks to the comprehensive cable package that includes a Scart cable, even beginners can get started straight away. The video source and format are detected automatically and digitised in the highest quality. You can even make backup copies of current DVDs or Video CDs.

The complete package

Everything you need to start immediately is included in the shipping package. In addition, there is also a printed manual and a quick start guide for correct wiring. 36 months warranty and lifelong technical support round off the package.
