About this product

While you're traveling, you never know what type of display monitor or projector you'll need to connect your laptop to. This travel adapter lets you connect your HDMI enabled source device, such as your Ultrabook™ or laptop computer, to any DisplayPort, DVI or VGA display.

Important operation notes

- To ensure optimal performance, connect the USB power cable to a USB power source, while the adapter is in operation.
- If you're connecting to a DisplayPort or DVI display, the VGA output button should not be pushed in.
- If you're connecting to a VGA display, the VGA output button should be pushed in.
- This adapter will not output digitally encrypted content through the VGA port.
- Only one video output is supported on the video adapter at a time. If multiple connections are made, only one of the video outputs will function.
