

HPE ProLiant DL360 Gen10 Server

ProLiant DL Servers

What's new

- Innovative design with greater flexibility to mix and match storage within a single chassis and capacity to support most dynamic workloads.
- HPE Performance leadership with Persistent Memory which harnesses the speed of memory and combines it with the persistence of storage.
- Protect, detect and remove with built in security features such as Silicon Root of

Overview

Does your data center need a secure, performance driven dense server that you can confidently deploy for virtualization, database, or high-performance computing?

The HPE ProLiant DL360 Gen10 Server delivers security, agility and flexibility without compromise. Supports the Intel® Xeon® Processor Scalable Family with up to a 71% performance gain and 27% increase in cores [1], plus 2666 MT/s HPE DDR4 SmartMemory supporting up to 3.0 TB [4] with an increase in performance up to 66% [2]. With the added performance that 12 NVDIMMs and 10 NVMe bring, the HPE ProLiant DL360 Gen10

Trust, Run-Time Firmware Validation and Secure Recovery.

- Supports Intel® Xeon® Processor Scalable Family with up to 28 cores and memory speeds up to 2666 MT/s.

means business. Deploy, update, monitor and maintain with ease by automating the most essential server lifecycle management tasks with HPE OneView and HPE iLO 5. Deploy this 2P secure platform for diverse workloads in space constrained environments.

Features

Industry-leading Performance with Versatile Compute

The HPE ProLiant DL360 Gen10 Server supports industry standard technology leveraging Intel's latest Xeon® Processor Scalable Family with up to 28 cores, 12G SAS and 3.0 TB [4] of HPE DDR4 2666 MT/s SmartMemory.

With support for up to 12 NVDIMMs per chassis and 2X capacity of first generation HPE NVDIMMs, the HPE ProLiant DL360 Gen10 Server delivers up to 192 GB per system. [3]

Achieve greater capacity with flexible drive configuration options with up to ten SFF, four LFF drives along with option to support up to ten NVMe PCIe SSDs delivering optimal performance, capacity, and reliability to meet various customer segments and workload requirements at the right economics.

HPE Persistent Memory, the world's first non-volatile DIMM (NVDIMM) optimized on HPE ProLiant compute, offers unprecedented levels of performance for databases and analytic workloads.

Innovative Design for Flexibility and Choice

The Premium 10 SFF NVMe chassis backplane provides the ability to mix and match SAS/SATA and NVMe within the same chassis along with 8+2 SFF and 4 LFF chassis that supports new uFF and M.2 storage options.

Embedded 4x1GbE plus HPE FlexibleLOM or PCIe standup 1GbE, 10GbE or 25GbE adapters which provides flexibility of networking bandwidth and fabric so you can adapt and grow to changing business needs.

Unmatched expandability packed in a dense 1U rack design with up to 3 PCIe 3.0 slots.

Security Innovations

Only Hewlett Packard Enterprise offers industry standard servers with major firmware anchored directly into the silicon. with security protection built in across the server lifecycle starting with Silicon Root of Trust.

Millions of lines of firmware code run before the server operating system boots and with Runtime Firmware Validation, enabled by iLO Advanced Premium Security Edition, the server firmware is checked every 24 hours verifying validity and credibility of essential system firmware.

Secure Recovery allows server firmware to rollback to the to last known good state or factory settings after detection of compromised code.

Additional security options are available with Trusted Platform Module (TPM) to prevents unauthorized access to server and securely stores artifacts used to authenticate the server platforms while the Intrusion Detection Kit logs and alerts when the server hood is removed.

Industry-Leading Serviceability and Deployment

The HPE ProLiant DL360 Gen10 Server comes with a complete set of HPE Technology Services, delivering confidence, reducing risk and helping customers realize agility and stability.

HPE Pointnext Services simplifies all stages of the IT journey. Advisory and Transformation Services professionals understand customer challenges and design an optimal solution. Professional Services enables rapid deployment of solutions and Operational Services provides ongoing support.

Services provided under Operational Services include: Flexible Capacity, Datacenter Care, Infrastructure Automation, Campus Care, Proactive Services and Multi-vendor coverage.

HPE IT investment solutions help you transform to a digital business with IT economics that align to your business goals.

Technical specifications

HPE ProLiant DL360 Gen10 Server

| | |
|---------------------------------------|---|
| Processor | Intel |
| Processor family | Intel® Xeon® Scalable 8100 series Intel® Xeon® Scalable 6100 series Intel® Xeon® Scalable 5100 series Intel® Xeon® Scalable 4100 series Intel® Xeon® Scalable 3100 series |
| Number of processors | 2, maximum depending on model |
| Processor core available | 28 or 26 or 24 or 22 or 20 or 18 or 16 or 14 or 12 or 8 or 6 or 4, depending on model |
| Processor cache | 8.25 MB L3 11 MB L3 13.75 MB L3 16.5 MB L3 19.25 MB L3 22 MB L3 24.75 MB L3 27.5 MB L3 30.25 MB L3 33 MB L3 35.75 MB L3 38.5 MB L3 |
| Processor speed | 3.6 GHz |
| Power supply type | 2 Flex Slot |
| Expansion slots | 3, for detail descriptions reference the QuickSpecs |
| Maximum memory | 3.0 TB with 128 GB DDR4 [4] |
| Memory slots | 24 DIMM slots |
| Memory type | DDR4 SmartMemory |
| System fan features | Hot-plug redundant standard |
| Network controller | HPE 1 Gb 331i Ethernet adapter 4-ports per controller and/or optional FlexibleLOM, depending on model |
| Storage controller | 1, Smart Array P408i-a or Smart Array P816i-a or Smart Array E208i-a, depending on model |
| Minimum dimensions (W x D x H) | 43.46 x 70.7 x 4.29 cm |
| Weight | 13.04 kg, minimum 16.27 kg, maximum |
| Infrastructure management | HPE iLO Standard with Intelligent Provisioning (embedded), HPE OneView Standard (requires download) HPE iLO Advanced, HPE iLO Advanced Premium Security Edition and HPE OneView Advanced (require licenses) |
| Warranty | 3/3/3 - Server Warranty includes three years of parts, three years of labor, three years of onsite support coverage. Additional information regarding worldwide limited warranty and technical support is available at: http://h18004.www1.hpe.com/products/servers/platforms/warranty/index.html Additional HPE support and service coverage for your product can be purchased locally. For information on availability of service upgrades and the cost for these service upgrades, refer to the HPE website at http://www.hpe.com/support |

HPE Pointnext

HPE Pointnext leverages our breadth and depth of technical expertise and innovation to help to accelerate digital transformation. A comprehensive portfolio that includes—Advisory, Professional, and Operational Services is designed to help evolve and grow today and into the future.

Operational Services

- **HPE Datacenter Care** offers a tailored operational support solution built on core deliverables. It includes hardware and software support, a team of experts to help personalize deliverables and share best practices, as well as optional building blocks to address specific IT and business needs.
- **HPE Flexible Capacity** is a new consumption model to manage on-demand capacity, combining the agility and economics of public cloud with the security and performance of on-premises IT.
- **HPE Foundation Care** helps when there is a hardware or software problem offering several response levels dependent on IT and business requirements.
- **HPE Proactive Care** is an integrated set of hardware and software support including an enhanced call experience with start to finish case management helping resolve incidents quickly and keeping IT reliable and stable.

Advisory Services includes design, strategy, road map, and other services to help enable the digital transformation journey, tuned to IT and business needs. Advisory Services helps customers on their journey to Hybrid IT, Big Data, and the Intelligent Edge.

Professional Services helps integrate the new solution with project management, installation and startup, relocation services, and more. We help mitigate risk to the business so there is no interruption when new technology is being integrated in the existing IT environment.

[1] Intel® measurements. Up to 71% performance increase of Intel Xeon Platinum vs. previous generation E5 v4 average performance based on key industry-standard benchmark calculations submitted by OEMs comparing 2-socket Intel Xeon Platinum 8180 to E5-2699 v4 family processors. Any difference in system hardware or software design or configuration may affect actual performance. May 2017. Up to 27% performance increase of Intel Xeon Platinum vs. previous generation comparing 2-socket Intel Xeon Platinum 8180 (28 cores) to E5-2699 v4 (22 cores). Calculation 28 cores/22 cores = 1.27 = 27%. May 2017.
 [2] Percentage compare Gen10 vs Gen9: Gen10 = 12 Channels x 2666 data rate x 8 bytes = 256 GB/sec. Gen 9 = 8 channels x 2400 x 8 bytes = 154 GB/Sec. 256/154 = 1.66 or Gen10 is 66% greater bandwidth, July 2017.
 [3] Comparing 8GB NVDIMM to 16GB NVDIMM equals 2X capacity increase. July 2017.
 [4] Coming in second half of 2017
