LT1022 IOT

Windows 10 IoT Enterprise LTSC

2 x fullsize USB 2.0

WIFI AC Dualband

The Lamina T1022 IoT Tablet comes with an powerful Intel Atom x5 Quad-Core Intel® processor that brings all the features of the Windows® 10 IoT Enterprise operating system to a stunning HD IPS 10.1" display. Dual band wi-fi gives you the extra edge in business connectivity.

Equipped with 2 GB of RAM and 32 GB Flash for an cost effective performance for a great variety of business and enterprise tasks such as Industry Tablets, Retail Point of Service, Kiosk, Digital Signage, ATM, Medical Devices, Manufacturing Devices, Thin Clients, Teams viewer clients etc.

What is Windows 10 Internet of Things Enterprise?

Bringing the full power of Windows to intelligent edge devices, Windows 10 IoT Enterprise has specialized features to create dedicated devices locked down to a specific set of applications and peripherals. It also has the same manageability, security and application/peripheral support as Windows 10 Pro and can leverage technologies like containers, Artificial Intelligence, Machine Learning and the cloud.

Windows 10 IoT Enterprise is a full version of Windows 10 that delivers enterprise manageability and security to IoT solutions. Windows 10 IoT Enterprise shares all the benefits of the worldwide Windows ecosystem.

It is a binary equivalent to Windows 10 Enterprise, so you can use the same familiar development and management tools as client PCs and laptops.

Windows 10 IoT Enterprise LTSC (Long-term Servicing Channel)

Specialized systems, such as PCs that control medical equipment, point-of-sale systems, and ATMs, often require a longer servicing option because of their purpose. These devices typically perform a single important task and don't need feature updates as frequently as other devices in the organization. It's more important that these devices be kept as stable and secure as possible than that they be up-to-date with UI changes. The LTSC servicing model prevents Windows 10 IoT Enterprise LTSC devices from receiving the usual feature updates and provides only quality updates to ensure that device security stays up-to-date. With this in mind, quality updates are still immediately available to Windows 10 IoT Enterprise LTSC clients, but customers can choose to defer them by using one of the servicing tools mentioned in the Servicing tools section.
