

Charging Cart / Safety Cart – Light for Laptops, iPads /Tablets

... mobile classroom with an unbeatable combination of security, mobility and versatility.

Partno: 62822K / 62822

Very sturdy construction with the same type of construction and lock that classified safety cabinets are equipped with. Provides a very burglary-proof storage.

Can be ordered with approved Key lock or with an advanced and approved code lock with many adjustment options

Front door and rear door simplifies wiring and provides a quick installation.

30 Laptops of up to 15.6" or 30 iPads/ Tablets/Mini-Laptops can be stored and charged simultaneously in the cart.

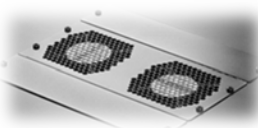

The Laptop/Tablet power adapters are stored inside the rear door in adapter bags that are hung on the shelf or inserted directly into the sockets. Fast and convenient installation.

The power adapter is very easy to loosen and very easy to take with you if you need charging outside the cart.

Special wheels make the cart very easy to manoeuvre and the big wheels makes it easy to drive even over high thresholds.

Powerful fan and Well-sized hole-image ensures good ventilation when charging and also operating if necessary to update the computers at night.

The cart is equipped with a slot for easy locking with the optional "Anchor kit-Wall" (630). Prevents unwanted mobility.

Charging Cart / Safety Cart – Light

- Charging Cart/Safety Cart – Light is CEKA-AnchorPad's new, proprietary lightweight Cart for safe storage, moving and charging up to 30 Laptops/Chromebooks up to 15.6" or 30 iPads/ Tablets with a maximum height of 23mm.
- Mobility enables the cart to function as a mobile classroom or in any context where the moving of Laptops/Tablets needs to be done.
- The cart has a safe and solid aluminum construction for the lowest possible weight and is built with the same type of construction and has the same locks that classified safety cabinets are equipped with. The cart is by far the most powerful and safest on the market.
- The cart has a unique and adjustable interior with padded shelves that can be easily adjusted in both width and depth, providing a future-proof and cross-platform cart for both Laptops/ Chromebooks and iPads/Tablets.
- Can be ordered in versions with approved keylock of high-security type or with advanced and approved code lock with many settings options that are a good choice if you are many users and eliminate key management). Unique design means that if the battery runs out of the Code-Lock, the battery is easily replaced from the outside of the cart.
- The cart has strong front and rear doors, which simplifies wiring and starting up the cart.
- The computer/tablet power adapters are stored inside the rear door in adapter bags that are hung on the inner wall or inserted directly into the sockets. Fast and convenient installation and very easy to take with you if you need charging outside the cart.
- Comes standard with powerful fan and well-sized hole image that ensures good ventilation when charging and also operating if necessary to update the computers at night.
- Special wheels make the cart very easy to manoeuvre and the big wheels makes it easy to drive even over high thresholds. 2 of the wheels have brake.
- The cart is CE-Marked for safe use and equipped with outlet strips with 30 earthed socket (220v) for connection of the Laptops / Tablets power adapters. Connection is then made to standard 220v sockets. Additional socket strip is available as an option if more sockets are needed (635).
- Smart Charging via App / Wifi. Easy scheduling of charging in groups to minimize load on the electrical system.

Options available for purchase as needed:

- Anchor Kit Wall (630) – Approved chain to prevent unwanted mobility.
- 3-phase adapter (637) if you want to charge Laptops/Tablets via a 3-phase socket.
- Charge/Sync-Unit for 16 iPads/Tablets (6899-16) and Charging Station USB-6-Port (6899-6).
(The cart holds several Charging/Sync units charging stations, allowing charging of additional iPads/Tablets if necessary).
