The legendary Hyper air cooler is back and better than before. The Hyper 212 Black Edition offers better installation and great performance, easily one of the best air cooling solutions. The aluminum top cover and nickel plated jet black fins give the Hyper 212 Black Edition a more premium exterior appeal . The sleek jet black not only makes it look great, but also increase cooling performance.

The Hyper 212 Black Edition maintains the same cooling efficiency as the Hyper 212 EVO. The Direct Contact Technology, stacked fins and 4 heatpipes reduces airflow resistance, reduces heat spots and increase airflow to the heatsinks.

As quiet as the night. The Hyper 212 Black Edition improved fan design reduces noise generated from the fan.

Features

Sleek Finishing - Anodized gun-metal black with brushed aluminum surface finish to the top cover for a more refined look

Precise Air Flow with Nickle Black - Stacked fin array ensures least airflow resistance which allows cooler air flow into the heatsink. The nickel plated jet black also enhances radiation cooling performance

Direct Contact - 4 heatpipes with Exclusive Direct Contact Technology providing effective and excellent heat dissipation

Silent Technology – Silencio FP120 include exclusive Silent Driver IC technology. It reduced noise and power output. The fan blade design inspired by helicopters, it pack more force into the space in front of the fan

Snap and Play - Intuitive fan bracket design makes upgrading and removing the fan a breeze
