

Mousetrapper advance 2.0

Next generation wellness. Now Mousetrapper advance 2.0 has arrived, the successor to our top-selling advance model. Advance 2.0 relieves and prevents repetitive strain injuries and other problems that can occur when you use a conventional mouse.

New version!

Benefits of Mousetrapper advance 2.0

Mousetrapper advance 2.0 is the successor to our very popular Mousetrapper advance model, and is available in two versions with stylish accent colours: white or turquoise. A total of six programmable buttons give you more options for setting up Mousetrapper to work exactly the way you want. The cursor speed has also increased and there is now a completely new scroll function, with buttons for scrolling up and down. The downloadable MT Keys software has also been upgraded with significantly more features for advance 2.0. There is also a completely new version of MT Keys for Windows 10, which can be downloaded from Microsoft Store. Replaceable wrist supports make it easier to keep the product clean. Mousetrapper advance 2.0 has a folding keyboard support, which makes it equally compatible with new low-profile keyboards and higher-profile standard keyboards.
