SL150 USB CONDENSER MICROPHONE

Thank you for choosing the SL150 Microphone.

The SL150 USB studio condenser features an onboard high qulaity analog-to-digital converter and USB output. It's going to transform the way you record music, with quality you wouldn't think could be possible from you USB port.

Follow these steps and you'll be recording in no time!

Installing the SL150 on your computer is simple. Plug it in and its done! No CD or software required, as everything is inside the microphone.

What you will need to do is make sure your SL150 is selected as your input device on your computer AND the software you are using.

**On a PC** simply go to Start > Control Panel > Hardware and Sound > Sound then manage audio devices. From here, select your SL150 as the input microphone and select a good recording level of at least 60%-70%. Then from within the preferences of your recording software, again select the SL150.

On a Mac simply go to System Preferences > Sound > Input and select the SL150. When you open up your recording software, go to the preferences and select your SL150 as the input microphone.

**Recording has never been so easy! Enjoy your SL150.**

SL150

Frequency Response Graph:

Specifications:

Element: φ34mm Gold Diaphragm Condenser
Polar Pattern: Uni-directional
Frenquency Response: 20-20kHz
Sensitivity: -36dB±2dB (0dB=1V/Pa at 1kHz)
Max. Input SPL: 140dB (at 1kHz ≤ 1% T.H.D)
Sample Rate: 16 Bit
Body: Solid Die-cast Construction

Uni−directional
(at 1KHZ)
