

Features and Benefits

Molex's termination tool was designed to provide a reliable connection at a highly competitive price. Originally developed to support the MOD-TAP KATT connector, the tool offers low-impact force termination, which reduces strain on the installer.

The tool has a lightweight impact resistant plastic handle with wire cutting immobiliser switch and scissors style cut-off that gives positive wire trimming, even on older blocks.

- Low -impact termination force
- Scissor style cut off
- Wire cutting immobiliser switch
- Light-weight impact resistant handle
