

## RollerMouse Free2 is an ultra-low ergonomic mouse alternative that is placed right in front of you

This central and flat position is the most comfortable position for your body. RollerMouse Free2 is our latest innovation, inspired by users and based on our ergonomic expertise. A modern, intuitive, slim design is combined with ultra-high precision and quality.

The cursor is controlled with a long rollerbar, which promotes the use of both hands and encourages movement variation. That's how RollerMouse Free2 allows you to work safer, faster and more comfortably.

**Award winning**

### Key features

#### Ultra-low ergonomic height

With a height of only 19.5 mm, RollerMouse Free2 allows your hands and arms to lie flat, giving you a more comfortable ergonomic position.

#### Fully open rollerbar

You control your cursor with a fully open rollerbar, which promotes the use of both hands and encourages movement variation.

#### Quick and easy cursor speed and precision selection

With a single touch of a button, you can choose between five cursor speeds (800, 1000, 1200, 1400, 1600 dpi) and achieve ultimate precision with the 1600 dpi setting.

#### Fits all keyboard heights

Accompanying keyboard risers ensure you can achieve the right height and angle for your optimal working comfort – no matter what kind of keyboard you have.

### A proven ergonomic concept

More than 500,000 users already enjoy a more comfortable working position thanks to Contour Design's RollerMouse. Their feedback has informed the innovative design of RollerMouse Free2.

RollerMouse Free2 has already won the Attendee's Choice Award 2010 at USA's National Ergonomics Conference and Exposition, as did its predecessor i 2008. This award is given to the best new product which increases productivity and profitability while improving workplace health and safety.

### RollerMouse Free2: A better way to work

1. Work safer and faster. Less physical strain and improved precision help you work more efficiently.
2. Get in an ergonomic position. Everything you need is placed right in front of you.
3. Two hands are better than one. Using both hands helps avoid discomfort and prevent pain by varying your position.

## Plug-and-play

RollerMouse Free2 is really easy to set up and use – just plug it into your computer's USB port, and you're ready to work.

## Key functions

Popular and often used buttons are in easy reach. Eight pre-programmed button functions reduce unnecessary and harmful micro movements.

- 1 **Rollerbar.** Roll the bar up, down and sideways to move the cursor. Use both hands for better variation and flexibility with the fully open rollerbar.
- 2 **Copy.** Ctrl + C with just one click.
- 3 **Left click.** Use the large left button to left click.
- 4 **Quick and easy speed selection.** Get high precision with a click. Choose between five cursor speeds ranging from 800 dpi to 1600 dpi.
- 5 **Scroll wheel.** A new, wider, rubber coated scroll wheel makes the click function even easier and smoother. Move up and down, middle click and auto-scroll lock.
- 6 **Double click.** Get two clicks in one with the 'one touch' double click.
- 7 **Right Click.** Use the large right button to right click.
- 8 **Paste.** Ctrl + V with just one click.

## Technical specifications
