> ULTIMATE EQUIPMENT PROTECTION FROM THE ELEMENTS

STRONGER BY DESIGN

The Peli Protector Case uses an open cell core and solid wall construction, which is actually stronger and lighter than a solid core wall. Travel light with heavy protection. And you know it's a Peli™ Case by the

distinctive dual band top surface. Stainless steel pins are used for hinges and handles. The new Double-Step latches are smarter and easier to open: it's the classic 'C' clamp design with a secondary movement that works like a pry bar to start the release and offers plenty of leverage to open with a light pull.

New Stronger Double-Step Latch

WATERTIGHT

The secret is the tongue-and-groove fit with Polymer o-ring acting as a waterproof seal. Also, the new Automatic Pressure Equalisation Valve releases built-up air pressure while keeping water molecules out, resulting in a watertight case that is even easier to open after pressure changes.

KEEP IT SHUT

Metal reinforced padlock protectors provide added strength and extra security against cutting and theft.

EXTRA PROTECTION

Peli's Pick N Pluck™ foam lets you customise the interior according to your gear. An easy, do-it-yourself system for custom-shaping the interior of the case according to your equipment. Layers of foam are pre-scored in tiny cubes. Simply measure your equipment over the grid and pluck away. Contents stay in place and get extra protection at the same time.

EASY RIDING

Stainless steel ball bearing wheels (on select cases) last longer and ride smoother. The nylon hub adjacent to the stainless steel is made to resist heat. Result: less wear and tear on the polyurethane wheel.
